

# Shane Pricken

## ABOUT ME

I am a motivated high school student seeking a part-time position to apply and further develop technical and interpersonal skills. I am a dedicated learner with long-term commitment to music and strong teamwork abilities, eager to contribute positively to the workplace.

## EDUCATION

### **Morris County School of Technology, Denville NJ**

Projected Graduation: June 2027

Current third-year student in the Academy of Computer and Information Sciences program

## PROJECTS

### **Chordify — Individual — [GitHub](#)**

Interactive application built with Processing (Java) that helps users learn and memorize guitar chords through a virtual fretboard with chord position visualization.

### **Cyber Security Safety Website — Individual — [GitHub](#)**

Holiday-themed educational webpage teaching basic cybersecurity concepts and common online threats through interactive activities.

### **AI Chord Detector — Individual — [GitHub](#)**

Built a web app that uses machine learning to identify guitar chords in real time from microphone input. Implemented audio processing and an AI model to analyze frequencies and deliver accurate, instant feedback.

### **NASA App Development Challenge — Team — [GitHub](#)**

Head developer on this Interactive Java application that visualizes and analyzes NASA asteroid data, providing insights into near-Earth objects and orbital information.

## SKILLS

- Programming in Java, Python, and C++
- Basic web development
- Logical thinking
- Debugging and troubleshooting code
- Knowledge of algorithms and data structures
- Computer technical support
- Familiarity with GitHub

## EXPERIENCE

- Collaborated with team members to design, develop, and troubleshoot software applications
- Participated in group planning sessions to break down project requirements
- Assisted in testing and refining applications by identifying bugs and suggesting improvements
